How to find drawings and other files

1. You will find all documents attached by the buyer in the **"QUOTE"** section for a part number.
To view them, you must download them (just click the blue file name).
2. Such a ZIP file contains all drawings and other related files.
If there is a large volume of files, multiple ZIP files may be provided. Maximum file size is 64 MB. Please check with your IT-department that your browser allows downloading this file size.
3. This README.pdf is the file you are currently reading.

Further questions

How to extract the zip-file

1. After downloading, you find the files in your download area.
The zip file must be extracted before you can make use of it.
2. Please extract the zip to a new folder
3. Once extracted, you will find:
 - **Files** folder containing all drawings and other documents sent via the RFQ.
 - **index.html** file. This is the **'master control base'** for gathering information!

How to read the html-file

- The header contains information such as the creation date, the RFQ number and version, and the material number (important if the RFQ covers multiple materials).
- The table contains the BOM structure and additional information:
 - BOM level
 - Material number
 - Material name (- see also (5))
 - Revision number of the material
 - Release date of the material
 - Quantity in BOM structure
 - Unit of measure
 - related documents (- see also (4))
- By pressing the triangles, you can
 - collapse the structure or
 - expand the structure
- Here you see the different types of documents, for example pdf, tiff, etc.
- Click the material name link to gather more details for this material (-> seen next slide)
